

**YOUR FULL NAME, COUNTRY OR TIMEZONE**

Your email

Discord nick (optional)

**PROJECT TITLE**

**Possible mentor:** name of the mentor

**About you**

Write information about you, what you study, where you are from, why you want to participate and other information you would like to share with us.

**Contributions and experience**

If you have already contributed to open source projects or to the Uramaki LAB, fill up this session telling us what you've done.

**Benefits to the open source**

Write why your project/task is useful for the community and the open source world

**Description**

Write a detailed description on what you 'll be doing. Feel free to divide it in as many sections you want to make your explanation very clear. If you have chosen a task from the ideas page, we still want to know how you will approach the task and how it is going to be implemented, so this section is also very important to you.

**Deliverables**

Write what you will be delivering during the summer. You can choose how you will be organizing this, either in work packages, sprints or the managing method you think works best for you.

**Schedule**

Fit your deliverables with the GSOC 2021 timeline and write here in which period you plan to do each part of your project.
